OPERATIONAL PROCESS MAP & GOVERNANCE DOSSIER

Warehouse Cold Chain & Inventory Management

Static Evidence Architecture

Evidence: Prove effective end-to-end controls over the risk based operational steps and stated process goals.

Document & Audit Identification

Document Name	Warehouse Static Evidence
Value Chain Process	Process 3 — Warehouse Cold Storage & Inventory Management
Master OPM Reference	**OPM-WH-CCIM01-v3**
Process Card Register ID	**PC-WH-2026-9331100**
Target Sales Order / PO	**LL628-0626**
Internal Barcode Serial	9331100
Target Commodity	Processed Edible Jellyfish Strips
Target Lot Number	**Jap682/1234**

Record Suite

To ensure operational efficiency without administrative duplication, control evidence for Process 3 is consolidated into three cohesive, role-based records.

Record	Record Title & Identifier	Executed By
Record 1 Electronic	**Automated IoT Environmental & Cold-Chain Telemetry Log** SYS-LOG-ZB-202605/06-9331100 System-generated electronic record.	Building Management System (BMS) / Refrigeration IoT Gateway
Record 2 Operations	**Cold Storage Daily Racking, FEFO & Facility Environmental Log** FORM-WH-RACK-20260605-B04 Warehouse floor operations record.	Cold Storage Lead Operator & Shift Supervisor
Record 3 QA Release	**QA Cold Storage Inspection & Stage 1 Pick-Release Endorsement** QAR-REL-2026-9331100 Quality assurance and clean handshake record.	Warehouse QA Officer & Quality Control Manager

RECORD 1 System Telemetry	RECORD 2 Floor Verification	RECORD 3 QA Release
Evidence sequence: Monitoring → Physical Verification → Release Authorization
